

Updating & Scanning With AVG

1. Click on the AVG link on your desktop

2. Click on the "Update now" button

3. Once AVG has finished updating, Click "Scan now"

4. Wait till scan has completed. When the scan is finished it will tell you your results. If there are any infected files, follow the instruction to delete them or move them to the vault. If AVG asks you to restart, it is best to save what you are doing and follow the instructions given by AVG.
